

AEC NEW COMPACT UNIT

INTRODUCING THE
"SWIFT"
with the most compact
engine/transmission/cooling
unit ever

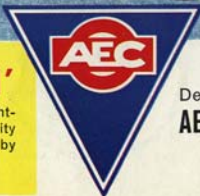

The greatest step forward in underfloor engine bus/coach design has been achieved by AEC with its new models. The 'Swift', offered with straight or dropped frames, leaf or air suspension, new horizontal 154 or 143 b.h.p. power units—with all auxiliaries compacted into 6 feet overall—represents a triumph of engineering design.

AEC
PUTS THE
STING
IN THE
TAIL!

AND THE 'MERLIN'

Supreme in the heavyweight field, the straight-framed 'Merlin' is intended for high-capacity loading, mainly overseas, and is powered by the AH691 205 b.h.p. engine.
